

Please do not mess with my XM Satellite Radio. If the locals compete fairly, they have nothing to lose. I live in a rural area and have found radio anew via XM Radio.

It always seems that when something good happens, the greedy slip in and try to legislate against. Let's let XM and local NAB providers compete for my listening. The best service will win.

Please oppose any legislation that will limit XM services to customers.

Thanks,

Gordon Snowbarger
